Welcome to the THOR Mobile App!

It is designed to operate the THOR electronic exhaust system and allows you to choose the

sound of your car engine. Different sounds are available as sound packages or Sounds. Each

Sound was recorded by our professionals from real cars and in special conditions. They accurately simulate the engines sounds of various legendary cars.

The App allows connecting to the THOR control unit using a smartphone, select Sounds by

preference and configure them. The range of Sounds is regularly updated, so you can download the new Sounds to your device! It's up to you, what your car will be today!

2. CONNECTION TO DEVICE

The "Find Device" screen allows you to set the connection with the THOR control unit. The first time you connect, the App will automatically find the device via Bluetooth.

2.1 BLUETOOTH DEVICE SEARCH

At this stage, the App will automatically connect to the THOR control unit via Bluetooth and allow you to proceed with further actions

17:08	•	17:04	•••••••		17:08	•	
FIND	DEVICE		FIND DEVICE			FIND DEVICE	
THOR	00949		THOR 00799	\supset			
1			THOR 00998			evice not found, heck Bluetooth	F
			THOR 00949			connection	

•Turn on Bluetooth on your smartphone and start the engine.

•Serial numbers of devices that can be connected will appear on a screen. Select the THOR control unit by tapping it.

•In order to update the list, swipe down (tap the screen and drag your finger from top to bottom)

2.2. SELECT THE CAR

At this stage, you need to select the car with THOR exhaust system installed

•Enter the car information in a sequential order.

•If the car is not supported, please call our technical support by phone from the main "Menu".

•Tap "Save" button.

•After saving information about the car, the device will be programmed in accordance with the selected car and you will be taken to the "My sounds" screen.

3. MAIN SCREEN - "MY SOUNDS"

"Sound" is an audio package that can be downloaded to or removed from the THOR control unit. Each Sound has three setting modes: "City", "Sport" and "Own". "City" and "Sport" modes have default settings and cannot be changed. "Own" mode allows to change any available Sound settings. Sound modes are displayed as icons with the image of the car on the "My Sounds" screen.

The "My Sounds" screen is the main screen that allows you to activate the necessary Sounds.

It includes:

- •list of available Sounds;
- •Connection indicator with the THOR control unit;
- •Main Menu button;
- •Button to go to the "Store"

3.1 MY SOUNDS

•The package of Sounds depends on whether the Sound is downloaded to the device or not

•The "My Sounds" screen can contain only one mode ("City", "Sport", or "Own") for each Sound downloaded.

3.2 CONNECTION INDICATOR WITH THOR CONTROL UNIT

CONNECTION INDICATOR

•In the upper right corner of the "My Sounds" screen, you can find the connection indicator with the THOR control unit, its color changes depending on the connection status.

•If the indicator is red, it means that the smartphone is connected to the THOR control unit

•If the indicator is gray, there is no communication with the control unit.

•If the indicator is gray, there is no connection to the control unit. Remember that to ensure the connection, you need to start your car and be inside it. Also make sure that Bluetooth is enabled on your smartphone

3.3 SOUND CONFIGURATION

•After connecting to the device, the "My Sounds" screen displays the available Sound modes

•To select a Sound, tap it.

•To mute a Sound, tap the Sound again.

•To download the necessary Sound modes, go to the "Store" by tapping the button at the screen bottom (red circle with a "+" symbol or with the word "Add").

3.4 SETTING OF THE SOUND PACKAGE APPEARANCE

•To remove a Sound from the "My Sounds" screen, swipe it to the left.

•A "cross" appears on the right. Tap it and Sound will be removed from the screen. However, it will remain on the device so you can add it again from the "Store" later.

•ΠIf you want to change the order of Sounds, tap and hold one of them. Sound icons will start shaking. To change the icon location, move it to any convenient place on the screen.

•Each Sound icon has "Sound settings" button on the right. Tap it to adjust the sound configuration.

•Only "Own" mode allows to configure sound ("City" and "Sport" modes have fixed default settings)

•Use the "Main Volume" slider to change the volume.

•On the "Start" screen, you can configure sound when starting your car engine.

•To change the tonality in the engine speed range from 500 to 1,000 rpm, use the "Idle

speed sound" slider.

•"Working cycle sound" allows you to configure tonality in the range of engine speed from 3,000 to 6,000 rpm.

•To change the popping frequency, select the number of pops in the "Sound" field.

4. MENU

In the upper left corner of the App there is the "Menu" icon. You can update the firmware of the THOR control unit, connect a new device, switch to Demo Mode, change the car info, as well as get additional information.

4.1. "UPDATE SOFTWARE"

In this "Menu" section, you can update the device firmware.

«INDICATOR OF FIRMWARE UPDATE AVAILABILITY»

•If a new release of the firmware is available, a red indicator will appear next to "Update Firmware"

•To update the firmware, tap this button. The downloading progress will be displayed on the screen.

•To cancel the downloading, tap "Cancel" (the button is located at the bottom of the screen)

•If you have the latest version of the firmware installed, when you tap «Update Firmware», a relevant notification will appear on the screen.

4.2. DEMO MODE

"Demo mode" allows you to try all the features of the App without connecting to the device. In this section, you can listen to available Sounds and see the appearance of settings screen

•In the main part of the screen there are Sounds with the names and images of various cars.

•By tapping on one of them, you can listen to the sound effect of a particular car.

•BAt the bottom of the screen there is the "Order Device" button. Tap on it if you want to purchase the THOR exhaust system.

•When you tap on "Sound Settings", a section opens that demonstrates the options for setting various parameters

•The "Add" button (at the bottom of the screen) will take you to the "Store" where you can review all available Sounds.

4.3. TECHNICAL SUPPORT AND DEVICE DATA

By tapping the "Menu" button, you can find the following info:

•Technical support (WatsUpp) phone number in case you have any questions

•Serial number of the THOR control unit

•Application version

• Firmware version of the THOR control unit

5. SETTINGS

In the settings menu, you can connect a new THOR device, change the car data, and also, manage additional settings of the THOR system

5.1. CONNECTING A NEW DEVICE

•If it's necessary to connect another THOR control unit, tap «new device»

•A notification will appear on the screen. Confirm that and you will be taken to the «Connection to device» section (paragraph 2).

5.1.2. "MY CAR"

- •In the «My car» section, you can see the parameters specified when connecting the car.
- •If necessary, you can choose another car. To do this, tap «Change» and enter the new car info.

5.1.3. SIRI COMMANDS

Siri control is available for iOS users

10.21		
<	SIRI COMMANDS	
Select Next S	Sound	~
Select Previo	us Sound	~
Mute Sound	In Thor	~
Turn On Sour	nd In Thor	~

5.1.4. NATIVE CONTROL BUTTONS

This function allows you to switch the sounds by car native control buttons. Cruise control`s speed limiter buttons +/- are in use for most supported cars (paddle shifters +/- also). Specify this from Thor technical support

5.2. DRIVE SELECT FUNCTION

Sound presents synchronization with engine/powertrain operating modes (Drive modes).

When you change the car drive mode, Thor exhaust sound should be switched, related Thor sound switches automatically

•Select the car profile marked with Drive Select phrase

There are car profiles without indication of Drive Select option in title

•Turn on the Drive Select switcher in application settings

Switcher appears, if Drive Select option is available for your car

5.2.1. MODES

Drive Select modes titles will appear in sound preset boxes. Drive Select modes always occupy the top sound presets

-STATUS 1

White — it is active. Exhaust sound changes when related car driving mode switches on

STATUS 2

Gray — it is inactive. The sound does not change itself. Thor system ignores this car driving mode.

STATUS 3

Crossed out — The system stops playing the sound, turns it of

Status can be changed by touching Drive Select title in the lower right corner

6. SOUND STORE

The "Store" screen allows you to download and remove sound packages. Downloading requires an Internet connection. If Sound is already downloaded, you can add one or another of its modes ("Own", "City", "Sport") to "My sounds" screen in this section. There will also be new Sounds available for purchase and subsequent downloading. Stay tuned and try different sounds

6.1 HOW TO BUY AND DOWNLOAD SOUNDS

The "Store" screen displays all Sounds available for purchasing and downloading. Pictograms located on the right of icons display the Sound status:

•A transparent circle with a checkmark means that Sound is downloaded and can be added to the "My Sounds" screen

•A white oval with a price means that the Sound is not bought, but available for purchasing at the indicated price.

•A red circle with a down arrow means that Sound is available for downloading to the device. After tapping this button, downloading starts.

•When the downloading is complete, a relevant notification will appear on the screen. Tap "OK"

6.2. SOUND MODES

If the sound package is downloaded, then you can add the necessary modes to the "My Sounds" screen (one mode "City", "Sport" or "Own" for each Sound)

•Each sound package has three modes (presets).

•In the «Own» mode, you can independently configure all available parameters.

•Once the download is complete, you will be able to find the new Sound on the My Sounds screen.

•«Sport» and «City» modes have fixed default settings and cannot be changed. «City» is recommended for everyday driving. In the «Sport» mode, the maximum parameters are set, which makes the Sound the most powerful.

6.3 SOUND PACKAGE DESCRIPTION

•If the Sound has not been downloaded yet, you can review its description and listen to it.

•The red "Download" button located at the bottom of the screen allows you to download the selected Sound to the device. If Sound has an icon with a price, then downloading will be possible after payment.

•When the downloading is complete, you can find the new Sound on the "My Sounds" screen.

6.4 SOUND PACKAGE DELETING

• Deleting a sound package from the device's memory is available from the store, you can delete the sound package swipe it to the left
